

June #MoveMore competition winner: Katie Kennedy

In June, the **Corp-American Heart Association** page on Microsoft Teams presented a month-long step competition. WPS participants logged over 6 million steps, but Katie Kennedy brought in 456,769 steps on her own! Congratulations, Katie, on winning the June competition!

Katie is a Claims Processor for WPS Military and Veterans Health, working from home in Georgia. She gets moving by taking daily walks with her husband and three young children around a nearby lake where there is always wildlife!

"This summer, we have seen a newborn baby fawn and its mother, lots of yellow-bellied sliders, varying water herons, hawks, Canadian geese, and mallards, king snakes and orange-bellied water snakes, chipmunks, squirrels, and even a short-tailed shrew! Every walk is an adventure."

When possible, Katie and her family visit the beach and especially enjoy sunrise and sunset walks along the beach.

This summer, her goal is to keep her whole family moving and active outside. To help with her health goals, Katie is a member of the AHA Teams group at WPS.

"The AHA Teams page is a great source of encouragement and inspiration. I love being part of an active community!"

If you want to compete this month in the #AddColor competition, join the **Corp-American Heart Association** group in Microsoft Teams!
